### 3. HAZARDS IDENTIFICATION (continued)

---

#### Unusual Fire, Explosion, and Reactivity Hazards

Containers in fire may burst or explode from excessive heat. Stay well back from fire area. Vapors may travel along floor to ignition source and flash back.

---

### 4. FIRST AID MEASURES

---

If poisoning is suspected, immediately contact a physician, the nearest hospital, or the nearest Poison Control Center. Tell the person contacted the complete product name, and the type and amount of exposure. Describe any symptoms and follow the advice given.

**Ingestion:** Call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person.

**Inhalation:** Remove victim to fresh air.

**Eye Contact:** Flush eyes with plenty of clear water.

**Skin Contact:** Wash skin with soap and water.

### 5. FIRE FIGHTING MEASURES

---

**Flashpoint (test method):** > 200°F (TCC)

**Flammable Limits (% in air):** Not applicable

**Autoignition Temperature:** Not available

#### Appropriate Extinguishing Media

Dry chemical, foam, CO<sub>2</sub>, water spray or fog. Avoid use of heavy water stream.

#### Fire Fighting Guidance

Smoke and fumes from fire may contain hazardous components. Use self-contained breathing apparatus and full protective clothing. Fight fire from upwind side. Avoid run-off. Keep non-essential personnel away from immediate fire area, and out of any fall-out or run-off areas. If water is used to fight fire or cool containers, contain run-off by diking to prevent contamination of water supplies.

#### Unusual Fire, Explosion, and Reactivity Hazards

Containers in fire may burst or explode from excessive heat. Stay well back from fire area. Vapors may travel along floor to ignition source and flash back.

---

### 6. ACCIDENTAL RELEASE MEASURES

---

#### In Case of Spills or Leaks

Isolate and post spill area. Wear prescribed protective clothing and equipment. Keep out animals and unprotected persons. Keep material out of streams and sewers. Dike to confine spill, and absorb with an absorbent such as clay, sand or cat litter. Vacuum, shovel or pump wastes into an approved drum. To decontaminate spill area, tools and equipment, wash with a suitable solution (i.e., organic solvent, detergent, bleach or caustic), and add the solution to the drums of wastes already collected. Label drums for contents. Dispose of drummed wastes, including decontamination solution, according to the method outlined in Section 13 – Disposal Considerations.
